Full Stack Developer

SKILLS

• TypeScript	• RedwoodJS	• React.js	• CSS	• Prisma
• JavaScript	• Next.js	• HTML	• Git	• Tailwind

WORK EXPERIENCE

Elevate Digital, Inc   Remote · January 2024 - Present
Software Developer (Contract)

- Developed custom features using RedwoodJS and Tailwind CSS, including a filter system, reusable components, and CRUD systems, to meet specific project requirements.
- Collaborated within a small, agile team using tools like Slack, Linear, and GitHub for efficient communication and project management.
- Utilized Prisma and GraphQL for database operations, resulting in optimized data handling and improved application performance.
- Delivered software solutions that enhanced user experience and increased client satisfaction by addressing specific business needs.

PROJECTS

WhatTodo

https://github.com/aidankmcalister/whattodo
REDWOOD.JS, TAILWIND, PRISMA, GRAPHQL, TYPESCRIPT, AUTH0

- Modern Todo app using RedwoodJS, TailwindCSS, Supabase, and deployed on Vercel.
- Enabled secure user authentication with Auth0 for sign-up, login, and logout.
- Engineered comprehensive CRUD functionality for managing todo items.
- Incorporated a sleek dark mode interface for improved user experience.

GigStack

https://github.com/aidankmcalister/gigstack
REDWOOD.JS, TAILWIND, PRISMA, GRAPHQL, TYPESCRIPT

- Musician platform for creating/sharing gig opportunities with user authentication.
- User-friendly interface for easy gig posting and browsing.
- Search/filter gigs by instruments and date created.
- CRUD functionality for managing gig posts efficiently.
